The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 2a) This action is FINAL. 2b) This 3) Since this application is in condition for allowant closed in accordance with the practice under E Disposition of Claims	- action is non-final. nce except for formal matters, pro

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1 and 21-22 rejected under 35 U.S.C. 102(b) as being anticipated by Tozama et al 6,098,32. Tozama shows a method for controlling movement of a load carrier that is pivotally attached to a boom which is pivotally mounted on a chassis, wherein a linear load carrier hydraulic actuator produces movement of the load carrier with respect to the boom and a linear lift hydraulic actuator produces movement of the boom with respect to the chassis, the method having receiving a boom velocity command (figure 3) designating a desired linear velocity for the lift hydraulic actuator; sensing a position of the lift hydraulic actuator; sensing a position of the load carrier hydraulic actuator; deriving a setpoint position 100 for the load carrier in response to the position of the lift hydraulic actuator and the position of the load carrier hydraulic actuator; producing an error value in response to deviation of an actual load carrier position from the setpoint position; producing a load carrier velocity command based on the boom velocity command and the position of the lift hydraulic actuator; and employing the load carrier velocity command and the error value to generate an

Art Unit: 3671

adjusted load carrier velocity command, and operating the load carrier hydraulic actuator in response to the adjusted load carrier velocity command.

As concerns claim 22, Tozawa having determining a velocity of the load carrier; generating a velocity error in response to deviation of the velocity of the load carrier from a desired velocity; and wherein producing the error value also is in response to the velocity error.

Allowable Subject Matter

3. Claims 2-20, and 23-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas A. Beach whose telephone number is 571.272.6988. The examiner can normally be reached on Monday-Friday, 8:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Will can be reached on 571.272.6998. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 3671

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
